

JOB DESCRIPTION

6 Cedarbrook Drive
Cranbury, NJ 08512
609-619-3156

Job Title:	Director of Biology
Reports to (Title):	Senior Director
Location :	Cranbury, NJ
Direct Reports:	Yes
Department:	Biology
EEO Job Category:	Full time

Job Summary: As the Scientific Director of Oncology & Immunology, they will lead discovery efforts for the highest performing target group within the broader oncology & immunology portfolio. This professional will have the opportunity to work across modalities including biologics, cell therapies, and small molecules while also having a high level of autonomy with the goal of identifying and developing clinical candidates for EBI's portfolio. Moreover, this role will impact the scientific direction and lead a team across preclinical drug discovery phases.

The Director of Biology Will Also:

- Perform basic and non-clinical disease research, with a focus on Immunology, Oncology/Hematology, and/or Cardiovascular/Metabolic Disease compounds (small molecules, biologics, and other novel modalities such as gene-therapy).
- Lead discovery research programs with the goal of characterizing and ultimately identifying preclinical candidates that will be transitioned into the clinic.
- Identify or develop appropriate in vitro and/or in vivo model systems to answer key biological or pharmacological questions.
- Collaborate with other functional groups within drug discovery and clinical development to achieve drug discovery goals.
- Identify and validate potential new drug targets and present for consideration as new drug discovery programs.
- Strategize with other senior members within the group to contribute to the overall scientific strategy and establish long-term research plans.
- Supervise and direct the activities of research associates and PhD level scientists, be responsible for the development of direct reports in both scientific knowledge and leadership skills.
- Represent oncology drug discovery and efforts to both internal and external stakeholders
- Interpret and present research at internal and external meetings.

Qualifications

- Ph.D. in Pharmacology, Cancer Biology/Genetics, Cell Biology or Immunology or related field or equivalent experience
- Post-doctoral experience in a relevant field

JOB DESCRIPTION

6 Cedarbrook Drive
Cranbury, NJ 08512
609-619-3156

- 8+ years of related pharmaceutical or biotech experience. Experience with global pharmaceutical companies is a plus.
- Proven experience identifying research projects and successfully running them in collaboration with internal and external teams.
- The ability to perform basic and non-clinical disease research, with a focus on Oncology/ Immunology.
- Excellent communication and interpersonal skills
- Experience working with cross functional teams internally and externally
- Exceptional command of contemporary discovery biology and adeptness in all aspects of cell biology and physiology
- Therapeutic experience in oncology & immunology; either with small molecule, biologics, or cell-based targets (not required to have all three) specifically for drug discovery efforts
- Impressive record of leading programs that result in the identification of the clinical drug candidates
- Track record of productivity in oncology research as demonstrated by publications in high impact peer-reviewed scientific journals.

This job description does not state or imply that the above are the only duties and responsibilities assigned to this position. Employees holding this position will be required to perform any other job-related duties as requested by Management.

EBI is an Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, or protected veteran status and will not be discriminated against on the basis of disability.
